

KANCHARLA RAMYA

Data Analyst | SQL • Python • Power BI • Excel

Guntur, Andhra Pradesh | ramyakancharla51@gmail.com | 6300455437 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Entry-level Data Analyst and B.Tech Computer Science graduate (2026) with hands-on project experience in SQL, Python, Power BI, and Excel. Has analysed datasets of up to 630,000+ records across e-commerce, streaming, and healthcare domains, building star-schema data models, interactive dashboards, and statistically validated insights. Seeking a fresher Data Analyst role to turn data into clear, decision-ready reporting.

TECHNICAL SKILLS

Visualization & BI: Power BI (DAX, Power Query, Star Schema, Row-Level Security), Excel (Pivot Tables, Dashboards, VLOOKUP), Tableau (basic exposure)

Programming & Databases: SQL (MySQL, SQLite), Python (Pandas, NumPy, Matplotlib)

Analytics: Data Cleaning, Exploratory Data Analysis, Descriptive Statistics, Hypothesis Testing (Z-test, T-test, Chi-Square), Linear Regression, KPI Reporting

Tools: GitHub, MySQL Workbench, Microsoft Office, YData Profiling, Sweetviz, AutoViz

PROJECTS

OTT Streaming Platform Analytics

Excel, Python, MySQL, Power BI, Statistics

- Consolidated 5 datasets (90,000+ viewing records, 2,000 users, 3 platforms) using Excel, Python (Pandas/NumPy), and MySQL to analyse engagement and churn.
- Built an 8-page Power BI dashboard with DAX measures and Row-Level Security to track engagement and churn drivers by user segment.
- Validated churn drivers with Z-test, T-test, and Chi-Square tests, and built a Linear Regression model (train/validation/test split); confirmed a 44.4% churn rate and drafted targeted retention recommendations.

ShopTrail E-Commerce Analytics Dashboard

Power BI, Power Query, DAX

- Designed a star-schema data model across 11 tables and 630,000+ records, using Power Query to clean and transform raw data.
- Developed an interactive dashboard covering product performance, campaign effectiveness, and customer engagement KPIs for business stakeholders.

Hospital Patient Health Data Analysis

Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed end-to-end EDA on 3,000+ patient records to study treatment cost, patient satisfaction, length of stay, and readmission risk.
- Automated data profiling and quality checks with YData Profiling, Sweetviz, and AutoViz, cutting manual review effort and surfacing key trends.

VIRTUAL EXPERIENCE

Deloitte Data Analytics Job Simulation (Forage)

July 2026

- Completed a simulated client engagement covering data classification and forensic technology analysis.
- Analysed structured datasets, built visualizations in Tableau, and presented findings in a business-ready format.

EDUCATION

B.Tech, Computer Science & Engineering — CGPA: 8.1

2022 – 2026

Chalapathi Institute of Engineering and Technology, Guntur

CERTIFICATIONS & ACHIEVEMENTS

- Professional Data Analytics with GenAI — NIIT
- Python — Infosys Springboard; Python (Basic) and SQL (Basic) — HackerRank
- Participant: IDEATHON and ITech Hackfest (data & technology hackathons); attended Data Analytics with Python workshop
